Then prove that this is the answer by using the distance formula.

In other words, since a 'midpoint' is suppose to be in the middle, shouldn't the length of AC and CB be equal?

Answer: To find the equation of the line through (1, 2) and (3, -1), it is essential to find the distance, midpoint, and slope of a line passing between the two points $p_1 (1, 2)$ and $p_2 (3, -1)$. The
