WATER SUPPLY AND SANITARY ENGINEERING (INCREMENTAL INCREASE METHOD)

Since 1924, Montgomery County Environmental Services has provided high quality water and sewer service to more than 250,000 citizens and businesses in Montgomery County, Ohio. Today, we operate and maintain approximately 1,200 miles of sanitary sewer and 1,400 miles of water main lines. Our environmental lab tests more than 12,000 water samples each year to ensure water quality and safety.

WATER AND SEWER SERVICES - Montgomery County, Ohio well, municipal water supply, or any other source which has been evaluated and found to be of satisfactory sanitary quality as determined by the State. (c) Artesian well water shall mean water that comes from a deep well where water is forced up by underground pressure.

CHAPTER I STATE SANITARY CODE

A sanitary sewer or foul sewer is an underground pipe or tunnel system for transporting sewage from houses and commercial buildings (but not stormwater) to treatment facilities or disposal. Sanitary sewers are part of an overall system called a sewage system or sewerage.. Sewage may be treated to control water pollution before discharge to surface waters. ...
